Labor Category	Labor Category Description	Min. Education	Min. Yrs. of Exp.
Project Manager	The Project Manager is responsible for overseeing and managing the planning, development, and implementation of information technology (IT) projects. The Project Manager will work closely with clients to identify project requirements, develop project plans and timelines, manage project budgets, and ensure project success. Key Responsibilities: Develop and implement project plans, timelines, and budgets in collaboration with clients and stakeholders. Manage project resources, including personnel, budget, and equipment, to ensure successful project completion. Identify and manage project risks, issues, and dependencies to ensure timely and effective resolution. Monitor project progress and performance, and report project status to clients and stakeholders. Coordinate project activities across multiple teams and stakeholders, ensuring alignment with project goals and objectives. Develop and maintain project documentation, including project plans, schedules, budgets, and status reports. Ensure compliance with project management methodologies, standards, and best practices.	Bachelors	5

Network Engineer	The Network Engineer is responsible for designing, implementing, and maintaining information technology (IT) networks, including local area networks (LAN), wide area networks (WAN), and wireless networks. The Network Engineer will work closely with clients to identify network requirements, develop network architecture, and ensure network performance, security, and reliability. Key Responsibilities: Design and implement IT networks, including LAN, WAN, and wireless networks, based on client requirements and industry best practices. Install, configure, and maintain network hardware and software, including routers, switches, firewalls, and wireless access points. Monitor and analyze network performance, identify and resolve network issues and bottlenecks, and optimize network performance. Ensure network security and compliance with industry standards and regulations, such as HIPAA and NIST. Develop and maintain network documentation, including network diagrams, configurations, and policies. Collaborate with other IT teams and stakeholders to integrate network systems with other IT systems and applications. Provide technical guidance and support to junior network engineers and IT staff.	Bachelors	5

Network Security Engineer	The Network Security Engineer is responsible for designing, implementing, and maintaining information technology (IT) network security systems and protocols. The Network Security Engineer will work closely with clients to identify security requirements, develop security architecture, and ensure network security, compliance, and risk management. Key Responsibilities: Design and implement IT network security systems, including firewalls, intrusion detection/prevention systems, and virtual private networks (VPNs). Monitor and analyze network traffic, identify and respond to security threats and vulnerabilities, and ensure compliance with security policies and regulations, such as HIPAA and NIST. Conduct security audits and risk assessments, and develop and implement security controls and mitigation strategies. Develop and maintain security documentation, including security policies, procedures, and incident response plans. Collaborate with other IT teams and stakeholders to integrate security systems with other IT systems and applications. Provide technical guidance and support to junior network security engineers and IT staff.	Bachelors	5
Project Management Sr III	Oversees program and project delivery with advanced scope, budget, and risk management for large-scale initiatives	Bachelors	10
Project Management II	Manages medium-complexity projects, coordinating scope, resources, risk, and stakeholders for on-time delivery.	Bachelors	6
Project Coordinator/ Management I	Coordinates projects by tracking tasks, managing schedules, communicating risks, and supporting deliverables under senior guidance.	Associates	2
SDN Architect I/II	Designs SDN solutions integrating network virtualization, automation, scalability, and security for enterprise environments.	Bachelors	5
R&S Architect I/II	Develops routing and switching designs, ensures network reliability, optimizes performance, and leads protocol configuration.	Bachelors	5
Security Architect I/II	Creates security architectures, assesses risk, applies compliance measures, ensures network protection, and guides remediation.	Bachelors	5

R&S Sr Engineer III	Implements advanced routing and switching, troubleshoots network performance, configures complex protocols, and mentors juniors.	Bachelors	8
Security Sr Engineer III	Implements security solutions, addresses advanced threats, conducts risk analysis, ensures compliance, and mentors teams.	Bachelors	8
R&S Engineer II	Supports routing and switching, troubleshoots network issues, optimizes performance, and implements standard protocols.	Bachelors	4
Wireless Engineer II	Designs wireless networks, configures radios, ensures coverage, troubleshoots interference, and optimizes throughput.	Bachelors	4
Wireless Sr Engineer III	Leads wireless network design, solves advanced interference challenges, ensures secure coverage, and optimizes performance.	Bachelors	8
Security Architect I/II	Develops security architectures, oversees risk, enforces compliance, and implements network protection strategies.	Bachelors	5
Services Consultant II/Security Sr Consultant	Advises on security best practices, conducts risk assessments, aligns services strategies, ensures compliance, and mitigates threats.	Bachelors	6
Security Sr Engineer III	Implements security solutions, addresses advanced threats, conducts risk analysis, ensures compliance, and mentors teams.	Bachelors	8
Security Technician	Performs security support tasks, monitors threats, checks compliance, assists with patching, and updates logs	Associates	2
Cloud Platform Architect I/II	Designs cloud platforms, integrates services, ensures scalability, maintains security, and oversees deployment patterns.	Bachelors	5
Cloud Sr Engineer III	Implements cloud infrastructure, automates deployments, enforces security, optimizes resource scalability, and mentors team.	Bachelors	8
SW Engineer/Agile Delivery DevOps Engineer I/II	Develops software, leverages Agile practices, configures DevOps pipelines, ensures CI/CD efficiency, and automates deployments.	Bachelors	3
SW/Agile Delivery Software Engineer I/II	Implements software solutions, follows Agile methodologies, conducts testing, integrates code, and optimizes development cycles.	Bachelors	3
Agile Delivery Delivery Leader	Analyzes business requirements, manages Agile backlogs, refines user stories, and collaborates with stakeholders on deliverables.	Bachelors	4
Data Center Architect I/II	Designs, plans, and implements enterprise data center infrastructure solutions including server, storage, network components, and supporting technologies.	Bachelors	6

Data Center Sr Engineer III	Manages and optimizes complex data center environments including server infrastructure, storage systems, virtualization platforms, and disaster recovery solutions.	Bachelors	6
Lead Services Consultant/Advisory Services Principal Consultant	Provides senior-level strategic consulting services, leads complex client engagements, and delivers high-impact enterprise solutions across multiple technology domains.	Bachelors	12
Services Consultant II/Advisory Services Senior Consultant	Delivers specialized technology consulting services, performs requirements analysis, develops solution recommendations, and manages client relationships to ensure successful outcomes.	Bachelors	8
Services Consultant Advisory Services Associate Consultant	Supports consulting engagements through research, analysis, documentation, and technical assistance for client-facing projects and solution development.	Bachelors	3
Engagement Manager/BAA Engagement Manager	Leads client engagement teams, manages project scope, schedule, and resources, and ensures quality delivery of professional services and solutions.	Bachelors	10
Business/Data Consulting Engineer	Designs and implements business analytics applications, data integration solutions, and reporting systems to support data-driven decision making.	Bachelors	10
Chief Architect/Principal Architect	Establishes enterprise-wide technical strategies, develops architectural frameworks, and guides technology implementation to ensure alignment with business objectives.	Masters	15
Chief Data Scientist/Consulting Engagement Manager	Directs data science initiatives, develops advanced analytics strategies, and leads the implementation of machine learning solutions to drive business outcomes.	Masters	12
Data Scientist/Consulting Data Scientist	Develops and implements advanced analytics, statistical models, and machine learning solutions to extract business insights from complex datasets.	Bachelors	5
Automation Architect III	Designs enterprise automation frameworks, develops integration strategies, and creates roadmaps for implementing process automation across multiple technology platforms.	Bachelors	10
Automation Sr Engineer III	Implements complex automation solutions, develops integration frameworks, and manages technical implementation to optimize operational efficiency and reliability.	Bachelors	8
Automation Engineer II	Develops and implements automated processes, scripts, and integration solutions to improve operational efficiency and system reliability.	Bachelors	5
SW Engineer I/II/Agile Delivery DevOps Engineer	Develops software, leverages Agile practices, configures DevOps pipelines, ensures CI/CD efficiency, and automates deployments.	Bachelors	3

SW Engineer I/II/Agile Delivery Software Engineer	Develops and maintains software applications using agile methodologies, writes efficient code, and collaborates with cross-functional teams to deliver quality solutions.	Bachelors	4
Agile Delivery Business Analyst	Analyzes business requirements, manages Agile backlogs, refines user stories, and collaborates with stakeholders on deliverables.	Bachelors	4
IT & VTC Support Specialist	Provides IT and VTC support, troubleshoots audiovisual issues, configures endpoints, and escalates complex incidents.	Associates	2
IT & VTC Support Engineer	Implements IT and VTC solutions, manages integration, optimizes system performance, and resolves complex issues.	Bachelors	4
Learning Sr Specialist	Designs learning programs, develops curricula, uses training strategies, conducts sessions, and evaluates performance.	Bachelors	6
Learning Specialist	Delivers learning content, creates training materials, facilitates sessions, supports curricula, and tracks participant outcomes.	Bachelors	3

2. Maximum order.
   SIN 33411 - $500,000
   SIN 54151S - $500,000

3. Minimum order.
   $100

4. Geographic coverage.
   Domestic - 48 States, DC

5. Point of production.
   10432 Balls Ford Road, Suite 332. Manassas, VA 20109

6. Discount from list prices or statement of net price.
   Prices shown are NET Prices; Basic Discounts have been deducted.

7. Quantity/volume discounts.
   None

8. Prompt payment terms.
   Net 30 days

9. Foreign items.
   All items are U.S. made end products, designated country end products, Caribbean Basin country end products, Canadian end products, or Mexican end products as defined in the Trade Agreements Act of 1979, as amended.

10a.   Time of delivery. ***30 Days ARO***

10b.   Expedited Delivery. The Contractor will insert the sentence "Items available for expedited delivery are noted in this price list." under this heading. The Contractor may use a symbol of its choosing to highlight items in its price lists that have expedited delivery.
Contact Contractor

10c.   Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery.
Contact Contractor

10d.   Urgent Requirements. The Contractor will note in its price list the "Urgent Requirements" clause of its contract and advise agencies that they can also contact the Contractor's representative to effect a faster delivery.
Contact Contractor

11.   F.O.B. point.
Destination

12a.   Ordering address.
10432 Balls Ford Road, Suite 332. Manassas, VA 20109

12b.   Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13.   Payment address.
10432 Balls Ford Road, Suite 332. Manassas, VA 20109

14.   Warranty provision.
Standard Commercial Warranty

15.   Export packing charges, if applicable.
Not Applicable

16.   Terms and conditions of rental, maintenance, and repair.
Not Applicable

17.   Terms and conditions of installation.
Not Applicable

18a.   Terms and conditions of repair parts.
Not Applicable

18b.   Terms and conditions for any other services.
        Not Applicable

19.   List of service and distribution points:
        Not Applicable

20.   List of participating dealers.
        Not Applicable

21.   Preventive maintenance.
        Not Applicable

22a.   Special attributes such as environmental attributes.
        Not Applicable

22b.   Section 508 compliance information is available on Electronic and Information
        Technology (EIT) supplies and services. The EIT standards can be found at:
        www.Section508.gov/.

23.   Unique Entity Idenitification (UEIN) number:
        NQ9QKJM2Z1E8

24.   Notification regarding registration in SAM.gov database:
        Registered.

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
